

Showers

MIRA FLEX AND FLEX EXTRA 9.0KW AND 9.8KW

Safe, precise, thermostatically controlled showering for total peace of mind. Inclusively designed for easy use by everyone. Advance ATL Flex is so safe it's earned a BEAB CARE mark - and so user friendly for blind and visually impaired users it's endorsed by the Royal Institute for the Blind. Flex brings extra flexibility with a rotary lever and colour contrasting panels plus extended fittings. Includes a dedicated connection to Whale suction pump for level access installations.

Note: The flex extra is designed to be used with CDS Whale Instant Match Pump.

REDRING SELECTRONIC PLUS 8.5KW

Selectronic and Selectronic Plus are the most technologically advanced instantaneous showers available today.

They combine thermostatic water temperature control with simple to use push button operation.

Selectronic is

pre-programmed to provide hot water at a comfortable and safe temperature. In lock mode, the temperature is capped

at 40°C with cooler adjustment; no accidental increase is possible.

The Selectronic was the first shower to achieve the new and additional safety standards required for care establishments and less able users – providing guaranteed protection against scalding.

These are the only showers in the world endorsed by the RNIB, making it the preferred choice of the blind, young children, elderly and less able.

SAFEGUARD T100 CARE ELECTRIC SHOWER 8.5KW, 9.5KW

Thermostatic temperature control – constantly regulated temperature provides safer showering for all the family. Endorsed by Beab Care for extra assurance

Adjustable timed shutdown – set the shower to automatically shutdown after a pre-selected time

Installation set maximum temperature stop – reduces the risk of accidentally turning the temperature too high

Phased Shutdown – when the shower is turned off, the water continues to run for a few seconds to flush out preheated water before stopping completely

Large start/stop button – for easy selection of your favourite shower setting every time

Low pressure indicator – operates when the water pressure is insufficient

Extended riser rail kit and hose with an additional bracket for ease of use

Ergonomic Rub Clean Showerhead – 5 spray patterns

Raised tactile features, large graphics and textured anti glare surfaces

Audible alert - when the shower is started and stopped

SAFEGUARD T100 CARE ELECTRIC SHOWER 8.5KW, 9.5KW

Low water pressure solution - suitable for where water pressure is low or unreliable

Thermostatic temperature control – constantly regulated temperature provides safer showering for all the family. Endorsed by Beab Care for extra assurance

Adjustable timed shutdown – set the shower to automatically shutdown after a pre-selected time

Installation set maximum temperature stop – reduces the risk of accidentally turning the temperature too high

Provision for connecting to a level access waste pump - making installation even easier and working as part of a total care solution

Phased Shutdown – when the shower is turned off, the water continues to run for a few seconds to flush out preheated water before stopping completely

Large start/stop button – for easy selection of your favourite shower setting every time

Low pressure indicator – operates when the water pressure is insufficient

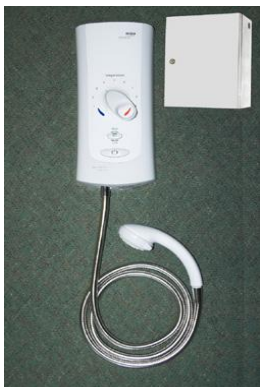

Extended riser rail kit and hose with an additional bracket for ease of use

Ergonomic Rub Clean Showerhead – 5 spray patterns

Raised tactile features, large graphics and textured anti glare surfaces

Audible alert - when the shower is started and stopped

CARE SHOWER

Product Overview

The Arrow Valves Care Shower is a special thermostatic electric shower (meeting BEAB Care Mark requirements as being safe for use by elderly, young and sick) and Booster Pump package (model CSABATLF).

The assembly has Fluid Category 5 backflow protection via integral AB air gap with booster pump and is therefore suitable for the highest risk applications.

The shower is supplied with a 2 m long hose. The integral backflow protection prevents contamination should the hose become submerged in bath or toilet water. The shower is designed to be easily operated with large tactile buttons and rubber grips on the adjustable spray head.

Supplied with spray head, slide rail and additional spray head holder.

SELECTRONIC MIXER SHOWER

Ideal for retrofit or brand new installations, the Selectronic Mixer, a TMV3 thermostatic shower features sleek design, including a patented 'through the ceiling' water connection - for one of the quickest installation times on the market. Built using the highest quality components this shower fits to just about any plumbing system, on virtually any pressure, with automatic shutdown if the water supply fails.

MIRA SELECT FLEX

Mira Select Flex combines stylish looks with the perfect mix of safety features. Large easy-to-handle levers with highly visible graphics, a 2m hose and a 1m slide bar make it the more flexible choice.

Thermostatic temperature stability keeps showering safe for all the family

Separate flow and temperature controls with extended levers

Maximum temperature stop for added safety

Single spray limescale fighting 'Everclear' showerhead

Cool touch valve technology - valve does not get hot during use therefore safe for use by all the family

Easy-glide and extra long slide bar gives increased height flexibility

Can be corner mounted - great in smaller enclosures

New variable pipe inlet centres help ensure easy installation

Approved to TMV2 standards - the highest domestic accolade for thermostatic temperature stability. Also approved to TMV3 standards suitable for use in healthcare applications
