

Specialist Toilet Seats

DANIA

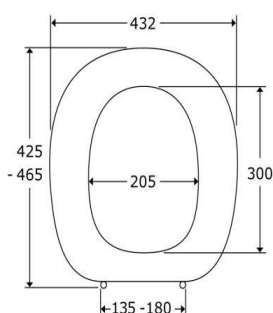

An ergonomically designed seat that is well suited to most people. Sideways transfer is easy because the seat is rather flat. The cover is comfortable to sit on, and when set upright it gives good support to the back.

Dania is available with an open front, which makes it suitable as a bidet seat. With easy access for a handheld showerhead.

ERGOSIT

Large, wide sitting surface with good support. Especially well suited to "large" adults with digestive problems. The bowels are stimulated by the seat's contoured surface that presses and acts on the thigh muscles and nerves.

Grooves at the back prevent adhesion.

COLANI

The curved bowl shaped supports and stabilises the pelvis and also makes the seat well suited for children (six years old and above) with muscular dystrophy. The raised side edges are easy to hold when the body needs to be stabilised. The cover is comfortable to sit on, and when set upright it gives good support the back.

BIG JOHN

The Big John Toilet Seat from CDS is ideal for making toilet use more comfortable. Its large area gives increased support and comfort without buying a new toilet. A width of 19"/50cm compared to the standard of 14.5"/35cm gives comfort, security and will give long lasting use in any household and the increased width makes the toilet seat ideal for a larger person.

The Big John fits to virtually every toilet seat with the use of two robust non-rusting stainless steel brackets, comes with a matching lid.
